

# DEREK LIEU

I'm passionate about technology and its ability to change the world, and I enjoy doing what I can to help make that happen. Whether it's running my own startup, helping another or supporting people to start their own businesses.

I've worked for, and founded, multiple tech companies and I've always had a strong interest in the design related aspects. I've been teaching myself UX/UI design for over a year and am now looking to learn from a working environment.

I bring a self-taught design foundation coupled with the ability to understand how design fits into the bigger scheme of the business environment.

# LENDR

## Mobile app

Lendr is a mobile app that facilitates peer to peer lending and borrowing of everyday items.

I used Lendr in multiple pitch competitions and created this prototype to bring the concept to life.

# STYLE SEEKER

Web app

Style Seeker is a marketplace for freelance hair stylists.

I take charge of all the UX/UI and related design aspects of the business.

# FREIGHTHUB

## Website

FreightHub is a platform that utilises excess logistics capacity to facilitate deliveries.

I redesigned their landing page and basic marketing website.
